

Maison Air et Lumiere

– meeting future demands with existing technology

Developer: the VELUX Group
 Architect: Nomada Architects
 Location: Verrières-le-Buisson, France

The vision has been to build a detached house without any environmental impact focusing on the living conditions of the residents. The modular design can be replicated to suit other contexts, including single family homes and terraced or urban houses.

The Active House Radar shows the performance of the building based on calculated and measured data.

- Calculation performance
- Measured performance
